

CS241 - Questions for Lab Assignment 2

1 INSTRUCTIONS

- (1) This lab is graded.
- (2) Those of you who have not completed the previous lab must complete it first.

2 QUESTIONS

Consider the following relations:

Student(snum: integer, sname: string, major: string, level: string, age: integer)

Class(name: string, meets_at: time, room: string, fid: integer)

Enrolled(snum: integer, cname: string)

Faculty (fid: integer, fname: string, deptid: integer)

The meaning of these relations is straightforward; for example, Enrolled has one record per student-class pair such that the student is enrolled in the class.

- (1) Create each of the above relations in SQL and create relation instances with the values given [2 Marks for the work + 3 Marks for viva].
- (2) Write each of the queries given to you in Lab 1 in SQL. [2 Marks for the work + 3 Marks for viva]
